

Enhanced Access for Anaesthetists

Easy access to patients intravenous/arterial lines, allowing swift medical response during surgery and continuous monitoring.

Time Saving Application

The design of the EAS allows seamless attachment to the operating table reducing prep time in the operating theatre.

Purpose Built Design

Unlike the use of other improvised devices such as a pillowcase, the EAS is tailor-made for this exact surgical scenario providing a secure and safe solution.

Versatile Positioning

Suitable for all surgeries that require the patients arm to be secured across the chest. Improving both safety and surgical conditions for Surgeon, Anaesthetist and patient.

Disposable and Cost Effective

Save on laundering costs with a disposable, hygienic and convenient alternative that is ready to use right out of the box.
